DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 16 March 2006 has been entered.

Allowable Subject Matter

2. Claims 1-4, 6-11, 13-22, 24-27, and 30-34 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Although, the best prior art of record to Wilson (US 6,213,705) discloses a tape storage library system comprising a proximity sensor for detecting optical signal determining presence of the tape storage according to the threshold, however, Wilson taken alone or in combination of other references, fail to specifically teach or fairly suggest that the storage library system comprises a controller and a sensor for detecting light reflected from the expected position of the storage device for determining the presence of the storage device based on frequency components of a signal associated with the linear scan by sensor exceeding a threshold wherein the frequency components vary with a distance of the sensor from a reflecting surface as set forth in the claims and present by the applicant.
